

Job summary:

Now you have the opportunity to join an innovative and growing team within the development of Biosimilars. We are recruiting a Project Leader for the team that wants to ensure the access of biologics to underserved patient populations globally. By joining Xbrane you will be part of a journey to create a Swedish success story in biopharmaceutical development.

You will be part of the Project Management team at Xbrane Biopharma AB. In this role you will join a highly dynamic team and will play an important role in developing strategies for the development of biosimilars. You must be highly motivated, flexible, creative and organized. In this role you must be able to plan and work collaboratively, but also independently, providing strong support to the team with your expertise within pharmaceutical development.

The Project Leader is responsible for ensuring that development timelines are met for the programs in the Biosimilar portfolio of Xbrane Biopharma.

This includes:

- To develop project plans and advancing through different phases of biosimilar development together with the project teams according to agreed timelines.
- To oversee risk assessments and identify barriers for the project. To develop clearly outlined mitigation and solution options as well as opportunities for enhanced project success.
- Escalate issues as needed to ensure necessary decisions and course correction before off-track events occur.

What You'll be doing:

- Develop full-scale project plans and budget for Xbrane's Biosimilar programs in collaboration with multi-disciplinary project teams and Heads of functions within Xbrane
- Ensure together with different functions that all development timelines and project plans are met in time and on budget
- Lead project groups and coordinate project work
- Report results and project status to company management
- Keep up to date in the field of Biosimilar and pharmaceutical development.

Qualification:

- University degree in Life Sciences with several years of experience within pharma industry
- Understanding of pharmaceutical development and mainly for biological development
- Several years of project management experience from the Pharmaceutical Industry

About you:

- You **make it happen!** You have the ability to drive activities independently and proactively while being part of a team where we encourage each other in a dynamic, fast-paced environment. Transparency and honesty are important to you.
- Every now and then you **beat yesterday!** You use a flexible, creative, pragmatic and collaborative approach ready to jump in where and when needed. You use your creativity in problem solving, you are open-minded and there is no such thing as a bad idea.
- You truly believe that **impossible is nothing!** You have the ability to look at a problem from alternative angles, are open to out-of-the-box solutions and have a "can do" spirit. You are brave, persistent and like turning challenges into opportunities – for each problem there is at least one solution.
- You contribute to create an environment where **we win as one!** Solidarity and togetherness are key to our performance and well-being. You enjoy being part of a team sharing the same

Project Leader

values and purpose, working together, giving trust, recognition & support as we grow as one Xbrane family – at Xbrane you will never walk alone.

What's in it for you:

- You will be working with development and commercialisation of products in the fast-emerging field of biosimilars
- You will be able to contribute with your experience and expertise in a changing environment and will have the opportunity to learn and develop in your role as Xbrane grows
- You will be part of a strong, dynamic team and will have exciting days at work
