

## Xbrane Supply Planner

Xbrane Biopharma AB in Solna is an innovative company developing Biosimilar products. There are approximately 60 people working at Xbrane, and 8 at the Manufacturing & Supply Chain department. By joining Xbrane, you will be part of a biopharmaceutical drug development company with the goal to ensure the access of biologics to an underserved patient population, enabling global health equality.

Xbrane is expanding and will be releasing a new product in the upcoming year. As the Supply Planner your main responsibility is to, based on forecast brought forward by Xbranes commercial partners, plan the production of the new product to meet market demands. You will also be responsible of managing forecasts and orders to the contract manufacturers among other administrative tasks.

### **Responsibilities:**

- Request and compile forecasts from Xbrane's commercial partners
- Plan the manufacturing of product at contract manufacturers through all steps of the supply chain in consultation and collaboration with the internal team
- Production Plan production, follow deliveries and ensure a sufficient stock of product to meet commercial partners' demand and avoid stock-out on market
- Provide contract manufacturers and analysis laboratories with forecasts and manage orders
- Administer production plan and related cost in the business system and Excel
- Provide product related data and costs to Xbrane's Finance and other internal departments
- Operating in close contact within the Manufacturing & Supply Chain team

You will have a close dialogue and interaction with the internal team in your daily work. Continuous improvement work will also be relevant since this is a new position/role within the department.

### **Qualifications:**

- A few years previous experience as a Supply Planner or equivalent, preferably within the life science industry
- Advanced Excel user
- SAP or other business system experience
- Experience with communicating with external contacts
- High proficiency in English

Other valued qualifications are previous work experience in finance, market analysis, project management or life science industry.

To succeed in this role, we see that you are a proactive, creative and well organized person. You have an analytical mindset and enjoy working with numbers. You work efficiently both independently and in groups, and you regard yourself as a problem solver and a good communicator.

Xbrane is a Great Place to Work certified company that offers an opportunity to grow in your professional role, as well as the opportunity to influence and further develop the company as a whole alongside a highly competent team.

If you have a can-do attitude and on top of that share our values; Make it happen, Beat yesterday, Impossible is nothing and We win as one, you will prosper with us.
