

Strategic Sourcing and Supplier Manager

Xbrane Biopharma AB in Solna is an innovative company developing Biosimilar product to make drugs accessible to less privileged populations globally. This is an exciting opportunity to join us as our Strategic Sourcing Manager (SSM). You will be part of a cross functional team where you drive business and build relationships with our contractors and strategic suppliers.

The Manufacturing and Supply Chain team is responsible for all Xbrane manufacturing activities in the development programs for future commercial products. They have many interactions with contract development and manufacturing organisations (CDMOs) and your focus as SSM will be on the business aspects of strategic collaboration with key suppliers and contractors.

Expect intense and interesting interactions with many different suppliers and partners together with Xbrane's other functions. You will be reporting to the Head of Manufacturing & Supply Chain.

The role:

- Develop and implement sourcing and supplier selection strategies
- Build and maintain a successful business collaboration with key suppliers and partners
- Lead cross functional teams (Program Managers, R&D, QA, SMEs and Legal) through sourcing and supplier selections activities, business cases and in contract negotiations
- Support the project teams in assessment and lead negotiations of proposals, scope changes and price discussions
- Build supplier selection and continuous evaluation processes,
- Supplier intelligence, keep Xbrane up to date with products, services, costs and capacity provided by external suppliers

Qualification:

- A university degree in Life Sciences, Finance or Legal combined with several years of experience within pharma industry.
- Experience from strategic supplier selection, building business cases and agreement negotiation in an international environment.
- Project management experience, including coordinating external activities and managing relationships with contractors
- Business acumen and experience from analysing and summarising information and preparing presentations to management
- Experience and knowledge in several of following areas: biopharmaceuticals, pharmaceutical development, commercial manufacturing of pharmaceuticals, supply and quality agreements, manufacturing cost estimations
- Additional experience with cGMP requirements is meriting.
- Excellent verbal and written communication skills in English

About you:

You ***make it happen!*** You drive activities independently and proactively.

You ***beat yesterday!*** You use a flexible, creative, pragmatic and collaborative approach.

You truly believe that ***impossible is nothing!*** You have a "can do" spirit and are brave, persistent and like to turn challenges into opportunities.

You contribute to an environment where ***we win as one!*** Solidarity and togetherness are key to our performance and well-being.
